

# Carbon Bows

Yamaha Carbon Bows are produced and adjusted by highly skilled craftspeople to deliver the same feel and playability as fine Pernambuco bows. But unlike wooden bows, changes in weather, temperature, or humidity have little effect on a carbon bow, making it highly stable and perfect for use in any situation—even outdoor concerts.

# Carbon Bows

for Violin, Viola, and Cello

## Pinchas Zukerman

Internationally renowned violin and viola soloist, chamber musician, and teacher Pinchas Zukerman worked together with Yamaha designers to produce a bow for professional violinists, as well as for serious students preparing for a career in music. His tremendous talent and experience coupled with close attention to the most intricate details guided the design of Zukerman's bow.

# Carbon Bows – By Yamaha

Yamaha has created a revolution in the string world by offering extremely high quality bows which are consistently produced—and at very affordable prices. At first, many professionals bought them as second bows to use for practice and when climatic conditions weren't favorable to natural wood. But more and more of these players have discovered that the carbon fiber bows are equal to some of the best professional Pernambuco wooden bows; yet for only a fraction of their cost.

The fact that world-class soloists such as Pinchas Zukerman and Zakhar Bron use Yamaha bows is a testament to how well they play, and many orchestral players have begun using them as their main bows too.

Yamaha offers some exciting options for selecting a new bow. The Signature Series are the result of design collaborations with outstanding international artists and were created to meet their exacting standards. In addition to these bows, Yamaha's lineup includes other models for violin, viola, and cello. Yamaha's carbon fiber bows can be used with complete confidence by discriminating artists in all musical situations.

## Standard Bows

### Violin Bows

### Viola Bows

### Cello Bows

**CBB105**  
These top-of-the-line carbon bows are individually crafted by highly skilled artisans, and offer the utmost in performance and quality. They have beautiful, high quality appointments including an ebony frog, an abalone and silver inlay eye, and ebony with abalone on the silver button.

**CBB205**  
This is an excellent choice for the professional violist looking for a fine quality carbon bow. Each is individually handcrafted to strict standards to ensure superior performance and quality. Ebony frog, abalone and silver inlay eye, and ebony with abalone on the silver button add a touch of tradition to this modern bow.

**CBB305**  
Like the CBB105 (violin bow), this top-of-the-line carbon bow for cello is individually crafted to deliver the best in performance and quality. It has beautiful, high quality features including an ebony frog, an abalone and silver inlay eye, and ebony with abalone on the silver button.

**CBB103**  
These bows are designed for the professional to be used as either a backup or primary bow. All are adjusted by hand, and the bow's appointments include ebony frog with abalone and silver inlay eye and silver button.

**CBB202**  
This bow's outstanding playability and great value make it an excellent choice for the advancing violist. Wrapping similar to that found on high-end models adds a refined touch to this fine bow.

**CBB301**  
For the skilled or advancing cellist, the CBB301 is an excellent choice offering excellent playability and outstanding quality for the affordable price.

**CBB101**  
A fine bow with excellent playability and outstanding performance for the price make this perfect for the advancing violinist.

## Zakhar Bron

One of the world's most respected and preeminent violin professors and soloists, Zakhar Bron is the mentor of such great violinists as Vadim Repin, Maxim Vengerov, Daishin Kashimoto, and Tamaki Kawakubo. Bron is very particular when it comes to bow performance and his collaboration with Yamaha manufacturing expertise has resulted in the Zakhar Bron signature bow.
