

Yamaha Silent Viola

With the new SVV-200, our craftsmen have brought a unique blend of tradition and technology into an instrument that combines the advantages of an electric instrument with the feel, playability and sound that is close to an acoustic. New insights into complexities involved when bow is applied to the string have resulted in this full-sized instrument that delivers amazing expressiveness with a tone that is natural and pure. Of course its silent characteristics let you practice anytime, anywhere, but soon you'll want to perform with it on stage or in the studio where the Silent Viola, and you, will shine.

Full-Sized Frame

The Silent Viola's standard 16" scale and full-sized frame design will make the violist feel comfortable from the start. While providing a more natural feel, its all-wood frame is finished with a special black matte finish and can accommodate nearly any standard chin and shoulder rest.

Dual Pickups Offer Greater Dynamic Range

A two pickup configuration delivers greater sonic "resolution" thereby increasing the dynamic range of the instrument. This allows the violist to play from pianissimo to fortissimo with greater clarity while delivering more of the nuances produced by the bow and playing techniques.

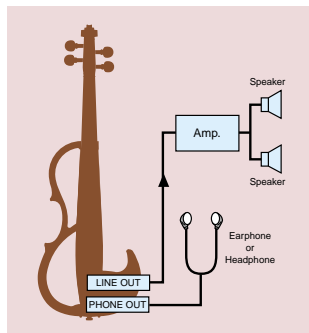

EQ Control

A special circuit designed by Yamaha isolates and controls the instrument's upper harmonics, which have a great influence on the overall tone. Modifying the tonal color makes it possible to adjust to individual playing styles, room conditions, the PA system, etc.

Quality Electronics

Noise free circuitry and line out impedance optimized for use with professional audio equipment make the Silent Viola excellent for use on stage or in studios where quality sound is a must. An EQ mode switch lets you skip the built-in EQ's default setting to take advantage of high-end equalization and tone controls available with professional audio equipment.

SVV-200

Color: Brown

SVV-200 Specifications

Strings Length	375mm (14-3/4")
Body Length	406mm (16")
Neck	Maple
Body	Spruce
Finger Board	Ebony
Bridge	Maple
Frame	Plywood
Tail Piece/Chin Rest	Ebony
Peg/End Pin	Ebony
Tuning Adjuster	1 (for E-string)
Sensor	Piezo Pickup
Electric Control	Volume, EQ Control, EQ Switch
Outputs	Line Out, Headphone Out
Battery	DC9V, S-006P
Standard Accessories	Earphone, DC9V, S-006P

All specifications subject to change without notice.
